

EXERCISES

Module 6 : Sustainable Hospitality

Exercise 1 - Scenario (50 minutes)

If a hotel wants to improve its water management, which system should it consider investing in ?

choices : Advanced water recycling systems, High-energy appliances, Non-recyclable products, None of the above.

(research should be about 20 minutes with after 40 minutes of sharing)

Exercise 2 - Word cloud (15 minutes)

Students should submit words they associate with "What comes to mind when you think about sustainability in hospitality?"

Participants can submit words or short phrases that are then displayed as a cloud, highlighting the most common responses.

Exercise 3 - Ranking questions and discussion (30 minutes)

Students should "Rank these sustainable practices based on their importance: Energy management, Waste reduction, Water conservation, Guest education."

Participants rank these options, and the results are displayed in real-time, showing common priorities.

After ranking, discussion is continued to discuss what are the specific reasons in a specific area.

Exercise 4 - Padlet collaboration (1 hour)

A collaborative board where students can post examples of sustainable hospitality examples in their country or from around the world. Each student should link a short description of how these examples adhere to different hospitality services.

Followed by discussion after.
